

# Clashindarroch Wind Farm

In numbers

↓ More than tomatoes:

Clashindarroch Wind Farm: 36.9MW  
114,469MWh on average every year

460,000 tonnes

460,000 tonnes of rock used at Clashindarroch Wind Farm – 15% more than the annual import of fresh tomatoes into Britain<sup>1</sup>

400,000 tonnes

UK Imports

↓ 4,000 people tread more gently on the earth:

Clashindarroch Wind Farm will save **49,000** tonnes of CO<sub>2</sub> every year

Reducing CO<sub>2</sub>

Clashindarroch Wind Farm will save 49,000 tonnes of CO<sub>2</sub> every year, the per capita carbon footprint of more than 4,000 in Aberdeenshire<sup>2</sup>

↓ 4 billion cups of tea:

4,000,000,000

Clashindarroch is expected to generate enough power every year to make 4 billion cups of tea<sup>3</sup>

<sup>1</sup> Britain imports 400,000 tonnes of fresh tomatoes every year <http://www.britishtomatoes.co.uk/tomato-facts/market-info/>

<sup>2</sup> Per capita carbon footprint from Aberdeenshire Council <https://www.aberdeenshire.gov.uk/green/ClimateChangeActionPlan2011-2015.pdf>

<sup>3</sup> According to RenewableUK the energy needed to make 1 million cups of tea is about 25,585 MWh
